

Basic Chromium Sulphate (Chrome Tanning Agent)

【Properties】 :

Molecular formula: $2\text{Cr}(\text{OH})\text{SO}_4$

Basic chromium sulphate is available in bright green powder with high tanning properties. The product is dried with most sophisticated steam drum drier which does not allow material to be overheated. It is not toxic and has better solubility.

【Specification】 :

Item	Standard
Cr ₂ O ₃ (%)	25-26
Basicity(%)	33-34
Fe(%)	0.1 MAX
Water nsolubles(%)	0.1 MAX
Na ₂ SO ₄ (%)	34.5

【Application】 :

The main application is making chrome tanned leather, insolubilizing proteins and other organic substances

【Packing】 :

In 25kg pp woven bag. can be palletized.
